FAQ 4

## FAQ

### **SB - Personalization Is:**

Our custom personalization service that lets you add meaningful text, intricate designs, or even images through the use of our per item template or templates to select products such as necklaces, bracelets, keychains, and many others. This process transforms each item into a unique keepsake that reflects your personal style or sentiment, and our step-by-step approach ensures precision, quality, and a beautiful finish that can be cherished for years.

To create your design, we provide an official template or set of templates that match the exact specifications of the particular product you selected. The template or templates feature a clearly marked zone representing the maximum personalization area — only artwork within this boundary will appear on your final piece. Simply open the template for the specific area you are wanting to work on in a raster-based image editor (such as Photoshop©, GIMP©, Canva©, Affinity Photo©, or Microsoft Paint©), add your design on a separate layer within the area, delete the template layer before saving, and export your work as a high-quality image file.

When you upload your file to the product page, our "Live Preview" function will allow you to see the results of your work as if the product has already been produced. Note: It is NOT, nor is it implied that the illustration you see or have seen onscreen is or will be, exactly what the finished product will look like. "Live Preview" is ONLY ATTEMPTING to provide a visual representation.

FAQ 5

**FAQ**

## Live Preview Is:

Our custom and proprietary function that we developed to allow our customers the ability to see or have illustrated for them their images on a mockup image of a particular product. It is NOT, nor is it implied that the illustration you see or have seen onscreen is or will be, exactly what the finished product will look like. This function is ONLY ATTEMPTING to provide a visual representation.

It is our hope that this helps our customers get a sense or idea of what their design(s) could look like for each individual product that this function is available on. Seeing is sometimes easier than hoping... We want all of our customers to have the best shopping opportunity & experience and to be informed (the best that we can) on their purchase(s).
